

## Foreword

Supplement 2/2008 of NUKLEONIKA was entirely devoted to the Conference RECENT DEVELOPMENTS AND APPLICATIONS OF NUCLEAR TECHNOLOGIES and contained 26 papers of 62 submitted for publication. However, some authors failed to prepare in time their manuscripts after referees remarks. Twelve papers corrected by the authors and approved by the reviewers were accepted for publication, a while after the closing date for the NUKLEONIKA issue containing proceedings of the Conference. The editor decided to include those papers in the regular issue and this is the reason why the Number 2 of Volume 54 is slightly untypical.

In the opinion of most of the participants, the Conference achieved a noticeable success. It is worth reminding that the Conference gathered over a hundred participants from 23 countries, 160 oral and poster contributions were presented and 38 papers were accepted and published in two issues of NUKLEONIKA. As it was mentioned, in the foreword to the first part of the proceedings, the idea of organizing such a Conference in the future was warmly accepted by most of the participants. Today, it may be said that the next Conference will be organized in 2011.
